Claim Rejections - 35 USC § 112

1. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, lines 2-3, there is a lack of antecedent basis for the spring seat. It is unclear if the claim should positively recite the spring seat or if it should have been set forth in a previous claim.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,581,804. Although the conflicting claims are not identical, they are not patentably distinct from each other because regarding claims 1-3, the hinged point of connection of the instant application is an equivalent to the "point of connection" that moves as disclosed in the

Art Unit: 3754

patent. Claims 4-8 of the application are slightly broader recitations of claims 4-8 of the patent.

4. Claims 9-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,581,804 in view of Fukada.

Ciavarella et al. claims all features, but lacks the spring means. Fukada shows a spring means 308. It would have been obvious to one of ordinary skill in the art to provide the spring as taught by Fukada on the device of Ciavarella et al. in order to promote movement of the casing back to its starting position.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen, Gentile, Bank et al. Newell et al., Warren and Moll show other fluid dispensing devices with cases.
